

METHOD STATEMENT AND RISK ASSESSMENT FOR

PULLING ACROSS GROUND BELTS TO BE WOUND UP

SITE:

CONVEYORS:

This is performed to eliminate the requirements of people lifting, pulling and dragging heavy belts by hand.

Wearing standard PPE of: overalls, safety boots, hard hat, appropriate gloves and eye protection.

Locate area where the belt will be pulled to.

Flash tape off any areas necessary.

Using a spotter ensure areas remain clear and safe.

Attach the belt to the tow bar of suitable vehicle by either slitting the belt, chain or lifting strap.

Pull the belt to the winder and wind up belt (see Method and Risk for Belt Winding).

.

RISKS

MINIMISED BY

Hit by vehicle
